

## ENTEK ELEKTRİK ÜRETİMİ A.Ş.

As ENTEK A.Ş. our aim is to:

- fulfill the requirements of ISO 27001 standard of our information security management system to determine and document policies and standards to ensure separation, certification and continual improvement of the organization,
- ensure compliance with all legal regulations and contracts related to information security,
- identify and systematically manage the risks to business processes,
- ensure that information is accessible only by authorized persons,
- provide technical and behavioral competencies to increase information security awareness
- provide training to develop the basic and supporting business activities of the institution that can be continued with minimum interruption
- protect the privacy, integrity and accessibility of assets,
- maintain and improve the reliability by preserving the principles of privacy, integrity and accessibility of assets

to manage our activities in an integrated and productive manner with other management systems that we implement and to work with all our power to become a model organization that we have pioneered in terms of information security in the energy sector.
